

LumoLife Dimming Mini Spotlight

Ideal for living and sleeping areas, the LED dimming mini spotlight has been designed with ease of use in mind. It has a touch switch for swift access and control, with multiple dimming levels to help enhance ambient lighting based on preference.

The light is:

- **Stylish**

The LED Dimming Mini Spotlight has a sleek and swift touch switch to match its stylish design. It has a chrome finish that complements the contemporary look of modern caravan and motorhomes, and exudes a warm white glow for ambient interior illumination.

- **Innovative**

Part of the LumoLife range, the dimming mini spotlight has been innovated to meet growing technology trends. It has a blue back light to help locate the touch switch, which has multiple dimming capabilities for optimum lighting control. Additionally it has an option of USB charge point integration for multiple uses.

- **Efficient**

An LED light fixture running from a single watt, with a three year lamp life, the dimming mini spotlight is an energy efficient solution that helps increase cost efficiencies and reduce power consumption.
